The BERNINA 990 features extraordinary innovations to make embroidering even more precise and easier than ever. Go beyond normal embroidery editing with the numerous on-screen editing features. With just the touch of a finger quickly edit and design your embroidery masterpiece visualized in the embroidery hoop. Easy, accurate and intuitive — the world is now your embroidery canvas.

Precisely position your embroidery on any project with the various placement options. The B 990 allows you to place a design down to a single stitch, even checking each stitch with the new BERNINA Pinpoint Laser. The new BERNINA Placement Scanner visualizes your hooped fabric directly on the screen as a background to preview design placement and colors. View the needle area on screen with the Camera and combine with the BERNINA Pinpoint Placement to accurately place your designs with ease, every time!

The new high-end Embroidery Module XL with BERNINA Smart Drive Technology (SDT) and the new Giant Hoop come standard with the B 990. The Giant Hoop expands your embroidery horizon with the extra-large space and ability to embroider a 16.1" x 12" area, including a full 12-inch square.

Save and organize your embroidery and stitch patterns directly on the machine or USB (type A or C) in the File Manager. Name saved files, create folders, cut, copy, paste and simply move entire folders of designs from the USB straight to your Personal Folder quickly and easily — just like magic!

The B 990 includes the **NEW BERNINA Embroidery Module XL** with SDT and **extra-large embroidery area** (410 x 305 mm, 16.1" x 12"), and the **NEW Giant Hoop**

Next generation embroidery with the B 990.

NEW BERNINA PLACEMENT SCANNER

Positioning of embroidery designs has never been easier. Scan to preview how your designs will look when stitched. Viewing the hooped fabric on the screen makes placement simple and provides a realistic preview for embroidery colors and sizing. Transfer the scanned background to the optional BERNINA Embroidery Software 9 to digitize directly on your hooped project.

NEW CUSTOMIZABLE LETTERING

24 embroidery fonts with limitless resizing! Create embroidery lettering perfectly to fit your project with multiple lines, alignment and corrections to previously made text. Edit the stitch density and pull compensation, and transform the shape and spacing to get perfect results every time.

NEW ARRANGE FEATURES

Easily align, distribute, group/ungroup and move design stitchout order all while editing your designs. Match Start and Stop points of designs to create endless border and quilting designs without having to individually place multiple designs.

PINPOINT PLACEMENT WITH NEW 4-POINT

Perfect design placement starts with exact virtual positioning. Pinpoint Placement gives you total control of the stitching placement of your embroidery. With the new 4-Point Placement, simply define four points on the fabric in the hoop and the design is placed proportionally or morphed to fit the created boundary.

NEW WIFI CONNECTIVITY AND BERNINA STITCHOUT APP

WiFi allows you to transfer embroidery designs from your optional BERNINA Embroidery Software 9 directly to your B 990, or the other way around. And thanks to the new BERNINA Stitchout App, the embroidery process can be monitored on your smartphone or tablet. The B 990 connects with the app allowing you to monitor the status of your embroidery stitchout from any room in your house. The app notifies you when the machine needs your direct attention, like thread color change, thread breakage or when the design is finished.
